

The do not call list is one of the best accomplishments the Government has done to increase the quality of life for its citizens. There is no legitimet reason we should be subject to unsolicited calls for products and services we have no interest in (which almost always come at inappropriate times). Let them advertise in newspspers or by mail where interested parties will see their message and uninterested parties can go on unaffected.

Before the law, about 90% of the calls we received were telemarketers, often blanket calls were they ring more phones than they can possibly answer resulting in your listening to air when you do pick up. We resorted to screening all of our calls which still meant we had to listen to the annoying ringing followed by a hang up.

Do not change the NJ Do Not Call Law.
